CONTENTS

ACKNOWLEDGEMENTS	3
LIST OF SYMBOLS AND ABBREVIATIONS	7
FOREWORD	9
1. INTRODUCTION	11
1.1. The road safety context	11
1.2. COST 329	12
1.3. ICTSA	12
1.4. SafetyNet	13
1.5. The current monography	13
2. METHODOLOGY	16
2.1. Historical overview	16
2.1.1. Towards a systemic approach	16
2.1.2. Different modelling approaches	17
2.2. The methodological framework	18
2.2.1. Towards an explanatory approach	18
2.2.2. The road risk process	19
2.2.3. Risk indicators and risk factors	19
2.3. The data	20
2.4. Focus in the current research	21
3. TYPES OF TIME-SERIES MODELS	22
3.1. structure of the models	22
3.2. Descriptive models	23
3.3. Explanatory models	24
3.3.1. Deterministic models	25
3.3.2. Structural models	25
3.3.3. Integrated models	26
3.3.4. Non-linear models	27
3.4. Handling time dependency	27
3.4.1. Time dependency	28
3.4.2. Classical techniques	29
3.4.3. Dedicated techniques	30
3.4.4. Recommendations	31
4. RESEARCH OUTPUT AND MAIN APPLICATIONS	32
4.1. Descriptive and explanatory analysis of trend	32
4.1.1. A comprehensive analysis of the frequency and severity of road accidents in Belgium	32

4.1.2. An analysis of the limitations in the effects of influential accident factors in Denmark	33
4.1.3. An explanatory analysis of road safety trends in the short/medium term in France	34
4.1.4. A multivariate descriptive analysis of trends of casualty data in the Netherlands.....	35
4.1.5. An explanatory analysis of a decreasing trend in the number of fatalities in Poland	36
4.2. Relevant applications to a single country	40
4.2.1. The importance of transitory factors on road traffic and road risk in France	40
4.2.2. The effect of the prospect of a presidential amnesty on road fatalities in France	42
4.2.3. The relationship between road fatalities and the unemployment rate in Poland	44
4.3. Comparative applications within Europe	47
4.3.1. Classifying countries in Europe according to the changes in the trend of their fatality rates	47
4.3.2. Comparing injury accident risk and accident severity in France and the Netherlands	49
4.3.3. Disaggregating data by gender and age to measure mortality in Belgium and the Netherlands	52
4.3.4. Comparing the inclusion of weather as a factor for a number of European regions	55
5. CONCLUSION AND OUTLOOK	58
5.1. Methodology	58
5.2. Techniques	58
5.3. Applications	59
5.3.1. Applications to a single country	59
5.3.2. Applications to several countries	60
5.3. Outlook	61
